FND Passport — a patient-controlled profile

An FND Passport is a digital profile the person controls. It can help communicate needs, experiences and important information in appointments, at work, in education or in an emergency — only with what they choose to share.

- The person decides what is included and who sees it.
- It is written in their own words and is not verified by a clinician unless they say otherwise.
- It does not replace medical records or clinical notes.
- Create one at https://fndconnect.org.uk/passport

not been labelled as clinically reviewed. FND Connect is an independent Community Interest Company. It is not part of the NHS and a conversation, enquiry or directory listing does not mean NHS endorsement.
